Kausik D

AI PRODUCT ENGINEER

+91 63695 75179 | kausikdevanathan@gmail.com | linkedin.com/in/kausik-devanathan | github.com/Kaus1kC0des | kausik.codes | Chennai, India

PROFESSIONAL SUMMARY

AI Product Engineer shipping production speech, LLM-agent and API systems, from the models to the GPU infrastructure and APIs around them.

WORK EXPERIENCE

Qik Office

July 2026 - Present

AI Product Engineer

Chennai, India

- Engineered a speech/NLP transcription and diarization pipeline (**Whisper + Pyannote**), evaluated at **95% speaker-attribution accuracy** and **7-9 min** per audio hour; adopted by **95% of enterprise customers**.
- Wrote a custom **MCP server** exposing Qik Office meetings, email, notes and tasks as LLM tools; built agents on the **OpenAI Agents SDK** with **human-in-the-loop** checkpoints and logging.
- Shipped an **OAuth 2.0** (PKCE) server and public **REST API** (**56 endpoints**, OpenAPI 3) for a multi-tenant SaaS without modifying existing controllers; validated via **27 E2E suites** and mutation testing.

Qik Office

Aug 2024 - June 2026

Software Developer Trainee

Chennai, India

- Architected a real-time transcription service: an SFU routes each meeting's audio via **FFmpeg** to **Faster-Whisper**, streaming live transcripts over **WebSockets**.
- Implemented GPU auto-scaling via the **DigitalOcean API**, provisioning new instances at **85% VRAM utilization** and sustaining **8-10 concurrent meetings per GPU**.
- Sole-owned the CPU-to-GPU migration on **DigitalOcean** (instances, CUDA, runtimes, all inference services), cutting processing time from **40+ min to 8-10 min** (**5× speedup**).

PROJECTS

RAG Study Assistant

RAG study assistant for college courses: PDF chunking and embeddings in MongoDB vector search, Gemini answers with source citations, served via async FastAPI with PostgreSQL and Redis, plus guardrails for unsafe outputs.

LangChain, Gemini, MongoDB Vector Search, FastAPI, Next.js

Project Nethran

AI assistive eyewear: YOLO-World object detection and CNN sign-language recognition, quantized for real-time edge inference on a Raspberry Pi 4 behind a Flask backend.

YOLO-World, CNNs, Raspberry Pi 4, Flask

EDUCATION

B.Tech Artificial Intelligence and Machine Learning St. Joseph's College of Engineering — Nov 2022 - May 2026

GPA: 8.06 / 10.0 | Winner, IIT Madras ML Challenge (Sep 2023) | Top 5, BITS Pilani Hackathon (Jan 2025)

SKILLS

AI & ML: LLMs (OpenAI, Gemini), RAG, Vector Search, LangChain, Agents, MCP, PyTorch, Whisper, Pyannote, YOLO

Languages & Backend: Python, Java, JavaScript, SQL; FastAPI, Node.js, REST (OpenAPI), WebSockets, OAuth 2.0/PKCE

Cloud & Data: AWS, GCP, DigitalOcean, Docker, GitHub Actions, CUDA; PostgreSQL, MySQL, MongoDB, Redis
